## Srest Web based Software

### 1. CRM Sales.

Market conditions are driving organizations to become more customer-centric and moving away from their traditional product-centric approach in order to achieve a customer-service differentiation strategy.

In order to achieve competitive advantage, companies deploy costly Sales CRM and ERP at their premise providing more inconvenience to the employees to use the large packages, which are difficult to comprehend.

CRM sales brings a complete online sales management application.

With CRM Sales, you can create and manage your customer's records, prospects' list with end-to-end result oriented features like:

- Sales Records
- Contact Details
- Prospects Details
- Customers Profile
- Products and Service Details
- Customized Reporting and Analysis
- Calendar
- Team Records with Sales Figures
- Calendar and Task management

### 2. Timesheet Management

The software maintains number of hours spend by user in each task of a project that is being assigned to him by the administrator. User fills in his timesheet on daily and weekly basis. When a task is assigned to user a mail is sent to him from the administrator about the its start date, due date and the priority of the task. Depending on the urgency of the task just 2 days before the due date user is reminded of the urgency of the task via mail.

**There are two level of users in this software. One is administrator and the other one is normal user.**

#### **Administrator does the job of**

- creating user or employees and add their skill set
- creates projects
- assigning tasks or work to the normal user and he mentions the priority, start date, due date
- mark the status of task and project as completed on feedback set by the user on timesheet
- schedules a calendar entry for each user
- checks all the reports pertaining to performance, project, status, activity and calendar reports

#### **Normal user or Employee**

- checks out tasks and projects assigned to him
- fills the number of hours spend on each task with notes on work done for that particular day
- fills the number of hours spend on each task with notes on work done for that particular week
- checks his performance report
